

TAMARICACEAE Tamarisk family

Tamarix gallica L. Tamarisk

Otterspool DP Earl 2009

Status & distribution: Neophyte-surviving; planted at intervals along or nearby to the coast from Aigburth (SJ3885) to Banks (SD31Z); rare further inland with a single record from Woodlands Road (SD80K, AR Locksley & C Walsh, 2004).

Earliest record traced: Ainsdale (SD31B, JD Massey, 1922, LIV).

Habitat: In hedgerows, amenity areas and parks on sandy soils generally nearby to the sea.

Comments: Native to the Mediterranean.
