

HYDROPHYLLACEAE Phacelia family

Phacelia tanacetifolia Benth. Phacelia

Halsall DP Earl 2009

Status & distribution: Neophyte-sown, widespread as a casual and a deliberate introduction.

Earliest record traced: Prescott (SJ49R, Rev M Toohey, 1910).

Habitat: Newly sown grass by roadsides, set-a-side strips adjoining arable fields, waste ground, tips and where wildflower mixes have been sown.

Comments: Native to California. Formerly a rare casual but increasingly recorded due to deliberate sowing in set-a-side programs.

Nemophila menziesii Hook. & Arn.

Baby Blue-eyes

Status & distribution: Neophyte-sown; Switch Island (SD3700, RF Goodchild, 2006).

Habitat: Sown ground.

Comments: Native to the western states of the USA. Plants were introduced in a 'wildflower seed mixture'.

Nemophila maculata Benth. Ex. Lindl.

Five-spot

Status & distribution: Neophyte, sown; Switch Island (SD3700, RF Goodchild, 2006).

Habitat: Sown ground.

Comments: Native to the western states of the USA. Plants were introduced in a 'wildflower seed mixture'.
